1. Contact Information Name	Cheryl Waldner
1. Contact Information Department	LACS/SPH
1. Contact Information Email	cheryl.waldner@usask.ca
1. Contact Information University	UofS
1. Contact Information Personal Web Page	https://www.researchgate.net/profile/Cheryl_Waldner
1. Contact Information Phone	306-966-7168
2. Please indicate the alignment of your research expertise to one or more of the following GWF objectives/ deliverables:	Inform adaptation to change and risk management – propose governance mechanisms, management strategies, and policy tools to reduce the risk of water threats, design adaptive strategies, and enhance economic opportunities
3.1 Please indicate the alignment of your research expertise to the GWF Science Pillar 1 – Diagnosing and Predicting Change in Cold Regions:	
3.2 Please indicate the alignment of your research expertise to the GWF Science Pillar 2 – Developing Big Data and Decision Support Systems:	
3.3 Please indicate the alignment of your research expertise to the GWF Science Pillar 3 – Designing User Solutions:	Agriculture – including farming, food processing, country foods Urban and Rural Communities Indigenous Communities
4. Please indicate the alignment of your research expertise to one or more of the following user needs:	Complex system modeling and analyses reflect the growing awareness of interacting dynamics in human-natural coupled systems. These studies emphasize the inter-relationships between water resources and transportation systems, infrastructure, energy generation, mining, food production, and source water protection.

Field	Response
5. Please list regions of Canada and the biomes (e.g. mountains, boreal forest, Great Lakes–St Lawrence), watersheds, and/or river basins where you are interested in conducting research for GWF:	Prairie provinces
6. Please list any other expertise or recent experience (subjects, river basins, technology) not covered by above query that could help us in assessing your alignment with the GWF programme:	GIS, epidemiology, biostatistics, simulation modeling of health outcomes,
