1. Contact Information Name	Mike Flannigan
1. Contact Information Department	Renewable Resources
1. Contact Information Email	mike.flannigan@ualberta.ca
1. Contact Information University	University of Alberta
1. Contact Information Personal Web Page	https://sites.ualberta.ca/~flanniga/
1. Contact Information Phone	780 248 2033
2. Please indicate the alignment of your research expertise to one or more of the following GWF objectives/ deliverables:	<p>Improve disaster warning – develop scientific knowledge, monitoring and modelling technologies, and national forecasting capacity to predict the risk and severity of extreme events</p> <p>Inform adaptation to change and risk management – propose governance mechanisms, management strategies, and policy tools to reduce the risk of water threats, design adaptive strategies, and enhance economic opportunities</p>
3.1 Please indicate the alignment of your research expertise to the GWF Science Pillar 1 – Diagnosing and Predicting Change in Cold Regions:	<p>Hydrometeorology and Climate Change – improve understanding and prediction of how climate change influences water availability and extreme events</p> <p>Hydrology and Terrestrial Ecosystems – improve understanding and prediction of hydrological and terrestrial processes and watershed hydrology and how processes and systems will evolve and interact under a changing climate</p> <p>Human–Water Systems – address the human dimensions that will determine water futures, including governance, policy, communities, border, and water resources management</p>
3.2 Please indicate the alignment of your research expertise to the GWF Science Pillar 2 – Developing Big Data and Decision Support Systems:	Decision Support Systems – predictive and diagnostic modelling system development and deployment for hydrology, water quality and water resources

Field

Response

3.3 Please indicate the alignment of your research expertise to the GWF Science Pillar 3 – Designing User Solutions:

Water Environment – ecosystem health and conservation, water management

4. Please indicate the alignment of your research expertise to one or more of the following user needs:

Projects to improve environmental monitoring, including sensors, drones, satellites, river basin observatories, lake buoys, software development, chemical fingerprinting, real-time monitoring, citizen science, and integration of Big Data platforms for Cold Region water science. Model development to support climate change impact assessment, including regional climate change modeling, hydrological and ecological modeling, specifically involving improvements in forecasting and predictive capacity, downscaling, and scenario development of water futures. Risk reduction and analysis tools, including forecasts of floods, droughts, wildfires, and freezing rain (and other weather and climate extremes); water quality assessments; disease risk analyses; and integrated assessments. These tools alert industry and government to potential problems and allow cost/benefit analyses for potential risk mitigation.

5. Please list regions of Canada and the biomes (e.g. mountains, boreal forest, Great Lakes–St Lawrence), watersheds, and/or river basins where you are interested in conducting research for GWF:

I do work at Global, Continental and National scales for many of my projects. For this effort, National, boreal forest and mountainous areas will be my focus.

Field	Response
6. Please list any other expertise or recent experience (subjects, river basins, technology) not covered by above query that could help us in assessing your alignment with the GWF programme:	<p data-bbox="829 205 1528 401">New project on researchgate – see https://www.researchgate.net/project/More-people-more-fire-less-water-exploring-wildfire-risks-to-water-security-in-a-changing-world-PhD-research.</p> <p data-bbox="829 457 1325 485">Francois Robinne is my PhD student.</p> <p data-bbox="829 541 1528 735">Robinne, F-N. Emelko, M., Miller, C., Bladon, K., Parisien, M.A. and Flannigan M.D. 2016. A global index for mapping the exposure of water resources to Wildfire. Forests. 7(1), 22; doi:10.3390/f7010022</p>
