

Field	Response
1. Contact Information Name	Donald Burn
1. Contact Information Department	Civil and Environmental Engineering
1. Contact Information Email	dhburn@civmail.uwaterloo.ca
1. Contact Information University	University of Waterloo
1. Contact Information Personal Web Page	https://uwaterloo.ca/civil-environmental-engineering/people-profiles/dr-donald-h-burn
1. Contact Information Phone	519 888-4567 Ext 33338
2. Please indicate the alignment of your research expertise to one or more of the following GWF objectives/ deliverables:	Improve disaster warning – develop scientific knowledge, monitoring and modelling technologies, and national forecasting capacity to predict the risk and severity of extreme events
3.1 Please indicate the alignment of your research expertise to the GWF Science Pillar 1 – Diagnosing and Predicting Change in Cold Regions:	Hydrometeorology and Climate Change – improve understanding and prediction of how climate change influences water availability and extreme events
3.2 Please indicate the alignment of your research expertise to the GWF Science Pillar 2 – Developing Big Data and Decision Support Systems:	
3.3 Please indicate the alignment of your research expertise to the GWF Science Pillar 3 – Designing User Solutions:	Other Industry – Including Insurance, Finance, Measurement and Engineering sectors
4. Please indicate the alignment of your research expertise to one or more of the following user needs:	Risk reduction and analysis tools, including forecasts of floods, droughts, wildfires, and freezing rain (and other weather and climate extremes); water quality assessments; disease risk analyses; and integrated assessments. These tools alert industry and government to potential problems and allow cost/benefit analyses for potential risk mitigation.

Field	Response
5. Please list regions of Canada and the biomes (e.g. mountains, boreal forest, Great Lakes–St Lawrence), watersheds, and/or river basins where you are interested in conducting research for GWF:	All of Canada
6. Please list any other expertise or recent experience (subjects, river basins, technology) not covered by above query that could help us in assessing your alignment with the GWF programme:	Currently a part of FloodNet and involved in projects that are developing new techniques for estimating extreme event quantiles and also looking at evaluating flood forecasting approaches.
