1. Contact Information Name	Catherine Hui Niu
1. Contact Information Department	Chemical and Biological Engineering
1. Contact Information Email	catherine.niu@usask.ca
1. Contact Information University	University of Saskatchewan
1. Contact Information Personal Web Page	http://www.engr.usask.ca/faculty/Niu_Catherine.php
1. Contact Information Phone	306-9662174
2. Please indicate the alignment of your research expertise to one or more of the following GWF objectives/ deliverables:	Inform adaptation to change and risk management – propose governance mechanisms, management strategies, and policy tools to reduce the risk of water threats, design adaptive strategies, and enhance economic opportunities
3.1 Please indicate the alignment of your research expertise to the GWF Science Pillar 1 – Diagnosing and Predicting Change in Cold Regions:	
3.2 Please indicate the alignment of your research expertise to the GWF Science Pillar 2 – Developing Big Data and Decision Support Systems:	
3.3 Please indicate the alignment of your research expertise to the GWF Science Pillar 3 – Designing User Solutions:	Water Environment – ecosystem health and conservation, water management
4. Please indicate the alignment of your research expertise to one or more of the following user needs:	Knowledge mobilization for decision support, including the facilitation of communities of practice, stakeholder engagement with science, visualization and Decision Theatres, development of place-based solutions for climate adaptation, and evidence-based decision making.

Field	Response
5. Please list regions of Canada and the biomes (e.g. mountains, boreal forest, Great Lakes–St Lawrence), watersheds, and/or river basins where you are interested in conducting research for GWF:	Saskatchewan, wastewater/water
6. Please list any other expertise or recent experience (subjects, river basins, technology) not covered by above query that could help us in assessing your alignment with the GWF programme:	Treatment of water containing heavy metals, organic pollutants/antibiotics, proteins, etc. by adsorption or related technologies.
