

Field	Response
1. Contact Information   Name	Michael Wilkie
1. Contact Information   Department	Department of Biology
1. Contact Information   Email	<a href="mailto:mwilkie@wlu.ca">mwilkie@wlu.ca</a>
1. Contact Information   University	Wilfrid Laurier
1. Contact Information   Personal Web Page	<a href="http://www.wilkielab.com/">http://www.wilkielab.com/</a>
1. Contact Information   Phone	519 884-0710
2. Please indicate the alignment of your research expertise to one or more of the following GWF objectives/ deliverables:	Inform adaptation to change and risk management – propose governance mechanisms, management strategies, and policy tools to reduce the risk of water threats, design adaptive strategies, and enhance economic opportunities
3.1 Please indicate the alignment of your research expertise to the GWF Science Pillar 1 – Diagnosing and Predicting Change in Cold Regions:	Water Quality and Aquatic Ecosystems – improve understanding and prediction of how climate changes in climate, hydrology, and land use impact water quality and the health of aquatic ecosystems
3.2 Please indicate the alignment of your research expertise to the GWF Science Pillar 2 – Developing Big Data and Decision Support Systems:	Decision Support Systems – predictive and diagnostic modelling system development and deployment for hydrology, water quality and water resources
3.3 Please indicate the alignment of your research expertise to the GWF Science Pillar 3 – Designing User Solutions:	Water Environment – ecosystem health and conservation, water management Agriculture – including farming, food processing, country foods Energy & Natural Resources – including mining and hydroelectricity

Field	Response
<p>4. Please indicate the alignment of your research expertise to one or more of the following user needs:</p>	<p>Projects to improve environmental monitoring, including sensors, drones, satellites, river basin observatories, lake buoys, software development, chemical fingerprinting, real-time monitoring, citizen science, and integration of Big Data platforms for Cold Region water science. Risk reduction and analysis tools, including forecasts of floods, droughts, wildfires, and freezing rain (and other weather and climate extremes); water quality assessments; disease risk analyses; and integrated assessments. These tools alert industry and government to potential problems and allow cost/benefit analyses for potential risk mitigation.</p>
<p>5. Please list regions of Canada and the biomes (e.g. mountains, boreal forest, Great Lakes–St Lawrence), watersheds, and/or river basins where you are interested in conducting research for GWF:</p>	<ul style="list-style-type: none"> <li>– Great Lakes</li> <li>– Grand River Watershed</li> <li>– Northwest Territories Rivers and Lakes</li> </ul>
<p>6. Please list any other expertise or recent experience (subjects, river basins, technology) not covered by above query that could help us in assessing your alignment with the GWF programme:</p>	<ul style="list-style-type: none"> <li>– Expertise in metal toxicity in fish and interactions with organic carbon and multi-metal mixtures</li> <li>– Invasive species control, with focus lampreys in the Great Lakes</li> <li>– Effects of biocides (piscicides) used in invasive species control on non-target fishes</li> <li>– Physiological impacts of temperature change, oxygen and ammonia on fishes</li> </ul>
